

Bringing the best in breast cancer detection to Northern Hospital

Digital Breast Tomosynthesis, also known as 3D Mammography, will directly influence the ability to detect and treat cancer early, when it is most curable.

This advanced technology will bring more accurate information, better outcomes, and the promise of a better future to many patients.

Pledge Your Support!

See reverse for details

It is the Foundation's utmost desire to provide Northern Hospital with the most advanced breast imaging technology available to best care for our friends, neighbors and loved ones.
